Help us convince legislators that the health, safety, and readiness of our children should be their #1 priority!

Last year, when we advocated for the health, safety, and readiness of our children at the legislature, policy makers told us, “If these issues are so important, where’s everyone else? We are flooded with emails and calls about other issues…!”

Every child should have the opportunity to become a successful thriving adult but legislators don’t seem convinced – children need us to speak up for them. If you are willing to be a voice for children, we will inform you when legislators need to hear your opinion of the health, safety, and readiness of our children.
